Summary Statement: An experienced researcher with nearly 25 years of work experience ranging from academia to private financial industry, with published research in numerous international referred journals crossing the boundaries between international economics & finance, international business and development studies. My expertise involves not only analytical research but also competence in applied econometric modelling with extensive usage of specialised softwares (RATS/CATS, EViews, STATA, Matlab, and Dynare). My current research concentrates on, first, international issues involving exporters' pricing behaviour in the aftermath of policy reforms (previously funded by British Academy), and the real effects of monetary, fiscal, & exchange rate shocks; second, financial issues covering the linkage between monetary policy & financial shocks, firm-level sources of financing & performance, and bank-level risk analysis with financial inclusion; third, development issues examining the linkages between macroeconomic policy & poverty reduction, consumption distance & social alienation (previously funded by Leverhulme Trust), and growth effects of human capital & rural financial development in low-income countries. For my published research, see my website above.

Professional Experience

Since 1 October 2011 – **Professor of International Finance**, School of Business and Management, **Queen Mary, University of London**, London, UK

Other appointments:

Co-Editor-in-Chief, *Economic Modelling*, Elsevier B.V., January 2015-

Visiting Professor, International Summer School at the University of International Business and Economics (UIBE), Beijing, China, 29 June – 28 July 2019; 9 July – 3 August 2018;

1 October 2008 – 30 September 2011: **Reader in International Finance**, School of Business and Management, **Queen Mary, University of London**, London, UK

1 October 2006 – 30 September 2008: **Senior Lecturer in International Finance**, School of Business and Management, **Queen Mary, University of London**, London, UK

1 December 2003 – 30 September 2006: **Lecturer**, Department of Economics, **Loughborough University**, UK

1 October 2001 – 28 November 2003: **Research Fellow**, International Economics Programme, **Royal Institute of International Affairs**, London, UK; **Responsibilities:** Worked on two funded projects on 'Global price transmission from China', and 'UK pension reforms and capital market development'. Prepared research grant proposals, & other duties included chairing research seminars at the Institute, occasional briefings & presentations, & media commentaries on economic issues.

6 January 1999 – 28 September 2001: **Associate-Economist**, Asia Credit Markets Research, **JPMorgan Chase, Hong Kong** (previously International Fixed Income Research, **Chase Manhattan Asia, Hong Kong** until December 2000); **Nature of Job:** During the three years of

my research here, I wrote a number of pieces combining financial market, macroeconomic and political analysis on India, Indonesia, Malaysia, Korea, Philippines, Hong Kong, and China for investment strategy and credit risk with reference to external debt markets. My contributions were published in the daily reports, weekly review, and monthly outlook and strategy. I developed a spreadsheet-based consistency model to generate macroeconomic forecasts for a regular quarterly publication. I worked on a bond-trading floor, directly with traders, sales and debt capital markets teams, along with the clients. The outlook was both tactical and strategic. I found the macroeconomics of countries in the region and the anticipated bond performance as vital to come up with longer-term investment recommendations about relative value among Asia's bonds.

October 1995 - September 1998: **Commonwealth Research Scholar and Part-time Tutor**, Department of Economics, **University of Warwick**, Coventry, UK; [Worked on my Ph.D. research].

July 1991 - September 1995: **Research Assistant, Institute for Social and Economic Change (ISEC)**, Bangalore, India [From January 1994 to September 1995, I was a Research Fellow under the Indian Council of Social Science Research (ICSSR) Salary-protected scheme and spent the year 1994 at the Economic Analysis Unit, **Indian Statistical Institute**, Bangalore]; **Description of duties:** Involved in providing expertise in the application of quantitative analysis in social science research and training, and preparing teaching materials in statistics and econometrics for the teaching program at the Institute. Also did macroeconometric modelling to examine the impact of stabilization and structural adjustment policies in the Indian economy.
